

RM-10869 proposal should have been grouped with the Morse Code proposals but since it arrived late, it was included here. I do not approve of this petition. It not only asks for 5 word a minute for some Classes but requests 13 words per minute for the Extras. I feel that this is a step backwards in requiring CW testing. I support continued CW portions of the band for those who wish to operate this mode but can see no reason to require CW testing to operate phone privileges.

RM-10869 is totally a pro-Morse Code petition. Therefore, I ask that no portion of the petition be considered.
